2019 RMS-SEPM Student Poster Symposium
Wednesday, April 3rd, 4-7pm
Wynkoop Brewery (Denver)
Mercantile Room

Attention Front Range Geos!

Come join us for our inaugural Student Poster Symposium + free beer & appetizers!

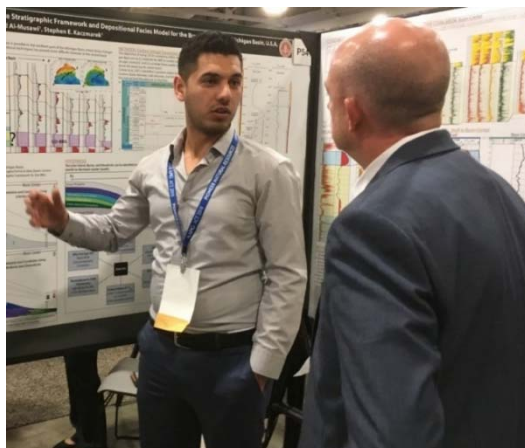

WHAT IS IT?: a poster symposium to bring together **undergrad & graduate students** to **showcase their research** with **industry veterans**

POSTER TOPICS & Presenters:

- Stratigraphic Architecture and Sediment Partitioning in the Mixed Siliciclastic-Carbonate Bone Spring Formation, Permian Basin (Wylie Walker)
- Chalk Full of Surprises: Colorado's Niobrara Formation as a Global Outlier in Cretaceous Chalk Reservoir Diagenesis (Rebekah Simon)
- Automated Lithology Prediction from Core Images and Well Log Data Using Machine Learning Algorithms: A Case Study from the Greater Schiehallion Area, West of Shetland, United Kingdom (Thomas Martin)
- Lateral Heterogeneity of Distal Submarine Lobe Deposits, Point Loma Formation, California (Kaci Kus)
- Three-dimensional eolian bounding surface architecture of the Entrada Sandstone, Utah: Expanding our understanding of reservoir heterogeneity in wet eolian prospects (Evan Gross)
- How Do Submarine Canyon-Channel Systems (Re)shape Continental Margins? (Luke Pettinga)
